

Devere Village Hotel - South Leeds for ISGRegions Limited Completed August 2008

This project followed on immediately from the first Village Hotel project successfully completed by Solinear for Devere as Ashton Moss, Manchester. As previously Solinear were contracted to Design, Manufacture and Install Solex HALO-300-50 elliptical profile solar shading blades to the feature front elevation wings of this new hotel.

The shading structure to each wing of the hotel extends 18.5m wide x 12.0m high as an 'unbroken' continuous appearance shading structure fixed back to curtain walling brackets set within the glazing construction at five levels.

Solinear SOLWAY access walkways were fitted behind the shading structures on 4 levels to provide window cleaning and maintenance access to the curtain walling system behind.

Solex AXIS 'lightweight' shading units have also been fitted to the Leisure block to reduce glare and provide shading to the swimming pool and adjacent areas. aluminum components.

Aquarius XLINE-100 continuous louvre screens were also supplied to the

hotel plantrooms fitted within large builderswork openings. Using the Aquarius XLINE-100 system Solinear also supplied two large ground level louvre enclosures with louvre door access and steelwork support structure to the 'mask' the compactor unit and water tank facility.
