

S. Chambers - Montague Road London Completed September 2007

Solex Medera 120-25 elliptical profile western red cedarwood timber shading was supplied and fitted within 6mm profile cut aluminum end plates using stainless steel pins to allow unrestricted blade movement within the structure and prevent splitting of the timber as it expands and contracts due to the external weather conditions.

The louvre door is arranged for outward opening and provides access to the curtain walling doors behind. The system was fitted back to aluminium brackets designed to suit the curtain walling mullion system and allow a seamless installation to the building structure.

▼ *Integrated entrance doors set within the timber shading facade*

▲ *Main Entrance to Conservatory*
